

Mud Tanks: PCI Tank Quality, Minus the Wheels

PCI Manufacturing's mud storage tanks are built according to strict quality standards, fully inspected and tested to ensure that every weld, cross member and nose-bar assembly functions flawlessly.

All PCI products are designed and built specifically to meet our customers' requirements in our state-of-the-art facility, with complete in-house fabrication, blasting and painting departments. Complete control of the manufacturing ensures the highest quality and consistency, tank after tank.

No request is too large or too small. From the mini-frac to multi-compartment tanks, PCI Manufacturing can custom-engineer every tank to ensure they survive the real-world test— long life in the field.

We keep our word, so you can keep yours

PCI's equipment is built to provide you with a long-term investment while meeting OSHA safety standards. PCI Manufacturing's low-maintenance, mobile or skidded designs ensure that your investment can be used
