

PCI SuperVac with Conex Box: Protect Your Equipment

The PCI SuperVac with a Conex box provides not only high quality PCI Manufacturing but also a vacuum trailer in a smaller, skid-mounted footprint that can withstand extreme weather conditions. Designed for placement next to rigs for quick cleanup on the floors, deck and cellars, the SuperVac with a Conex box is also versatile enough to be used at refineries, industrial, environmental or manufacturing locations. Made to perform, with a variety of safeguards to protect both the asset and personnel, the PCI SuperVac is the most efficient way to quickly clean up fluid spills in challenging environments.

We keep our word, so you can keep yours.

All PCI products are designed and built in our state-of-the-art facility, with complete in-house fabrication, blasting and painting departments. Absolute control of the manufacturing process ensures the highest quality and consistency.

Our equipment is built to provide you with a long-term investment while meeting OSHA safety standards. PCI Manufacturing's low-maintenance, mobile designs ensure that your investment can be used again and again.
