Liquid Level System is the most advanced tank level system available for tank truck industry!

The system was developed primarily for the liquid waste industry where it has been proven successful for use in the most difficult applications.

The Depth Ray System does not require floats, rods or interior components and it is not affected by rags, hair, strings, grease or other debris.

Installation is simple:

- ◆ ***NO CONFINED SPACE ENTRY***, all necessary work is performed on the exterior of the tank.
- ◆ ***TWIST LOCK CONNECTIONS***, three simple, no question connectors.
- ◆ ***WEATHER PROOF DISPLAY ENCLOSURE***, rust and corrosion proof.
- ◆ ***DIGITAL DISPLAY***, Indicates choice of gallons, barrels, inches, imperial gallons at ¼" increments.
- ◆ ***TWO RELAY POINTS***, can control lights, alarms, pumps and valves.
- ◆ ***LOW POWER DEMAND***, 12 Volts, 0.03 Amps
- ◆ ***READS TO WITHIN 1" OF FULL IN ¼" Increments***, depending on mounting height.
- ◆ ***D.O.T. AND NON-DOT TANKS***, exceeds Department of Transportation requirements for MC407 / 412 tanks.

One year limited warrantee on Parts and Operation. Refer to the Depth Ray manual for details.
