

440-bbl Double-Wall, Round-Bottom Tanks

PCI Manufacturing's double-wall, round-bottom tanks are built for single-unit secondary containment. With double walls on five sides, this tank allows you to breathe easy knowing that any breach of the inner tank would be automatically contained for easy cleanup.

All PCI products are designed and built specifically to meet our customers' requirements in our state-of-the-art facility, with complete in-house fabrication, blasting and painting departments. A full quality control team ensures the highest quality and consistency, providing the end user a low-maintenance, long-term asset.

Our service and attention to our customers' needs for specific requirements and specs sets us apart from other manufacturers. Our equipment is built to provide you with a long-term investment while meeting DOT and OSHA safety standards.

We keep our word, so you can keep yours.
