

Mini-Frac/Fluid Bin Tank: Small Tank, Big Results

The Mini-Frac tank provides the high quality PCI Manufacturing customers have come to expect, while creating a smaller site footprint. Ideal for smaller sites typical of refineries, industrial and manufacturing customers where space is in short supply, this tank makes every inch count. Made to perform, the PCI Mini-Frac endures the stresses of the oil and gas industry.

We keep our word, so you can keep yours.

Our equipment is built to provide you with a long-term investment while meeting OSHA safety standards. PCI Manufacturing's low-maintenance, mobile designs ensure that your investment can be used again and again.
